Blending innovation and value into exceptional seed products. Mixing incredible service and expertise to form lasting rela-

**Appalachian** Kentucky Bluegrass is a new and improved variety. It is a rhizomatous, sod-forming cool-season grass. It has shown to have early spring green, good color, resistance to prevalent turf grass diseases, and has good overall turf quality. It offers a high density, dark green color which is an excellent choice for home lawns, parks, playgrounds, SOD farms and other turf applications. **Appalachian** was developed with quick establishment in mind. It is wear tolerant and repairs itself by rhizomes. It may be seeded alone or in mixtures with other species like perennial ryegrass, creeping red fescue, chewings fescue, or tall fescue. Kentucky bluegrass gives lawns a great look by spreading to fill in open areas or thickening existing stands.

### Features & Benefits

- > EXCELLENT DROUGHT TOLERANCE
- > QUICK ESTABLISHMENT
- > STRONG DISEASE RESISTANCE
- > DARK GREEN COLOR
- > RAPID GREEN UP
- > WINTER COLOR & DENSITY
