

AQUADUCT

Tall Fescue

Value

Innovation

Service

Expertise

Blending innovation and value into exceptional seed products. Mixing incredible service and expertise to form lasting relationships.

Aquaduct Turf Type Tall Fescue has become the largest selling turf grass in the United States due to its drought tolerance. **Aquaduct** takes drought tolerance to a new level and has been qualified by the Turfgrass Water Conservation Alliance (TWCA). **Aquaduct** also demonstrates superior wear tolerance and Summer ground cover, making it a prime choice for landscaping.

This new generation of Tall Fescue is dark green and forms a lush turf that will stay greener longer without supplemental irrigation. In two recent NTEP trials, **Aquaduct** demonstrated to be a top Tall Fescue performer under Traffic Stress conditions. In another separate NTEP trial, **Aquaduct** was among the top performing Tall Fescues for "Percent Living Ground Cover In Summer," grown in several different locations!

The qualification of **Aquaduct** by the Turfgrass Water Conservation Alliance (TWCA) represents a big benefit of this turfgrass. The protocols for TWCA certification are highly demanding, requiring that water-starved grass maintain green covering through a series of drought simulations.

Features & Benefits

- > EXTREMELY SHADE TOLERANT
- > SIGNIFICANT WATER SAVING POTENTIAL
- > IDEAL FOR SOD PRODUCTION AND LANDSCAPING
- > TRAFFIC STRESS TOLERANCE
- > DROUGHT RECEPTIVE
