## Tall Fescue

Value

Innovation

Service

Expertise

Blending innovation and value into exceptional seed products. Mixing incredible service and expertise to form lasting relationships.

**AquaVita** introduces a new proven drought tolerant Tall Fescue that addresses our ever important need for water conservation. Providing more than water savings, exhibiting exceptional turf quality and density, making it among the best choices for landscaping - especially in areas with heavy water restrictions. Tall Fescue inherently requires less water than most other species, but **AquaVita** has remained green up to 30 days longer without added moisture than other Tall Fescues tested in rain-out shelters.

Ranked in the top five entries for Average Turf Quality out of 120 in the NexGen Turf Research trials. Plus, **AquaVita** is Turfgrass Water Conservation Alliance (TWCA) approved. The qualification of **AquaVita** by the Turfgrass Water Conservation Alliance (TWCA) represents a big benefit of this turfgrass. The protocols for TWCA qualification are highly demanding, requiring that water-starved grass maintain green covering through a series of drought simulations.

### Features & Benefits

- > EXCELLENT DROUGHT TOLERANCE
- > EXCEPTIONALLY DENSE TURF
- > SHADE TOLERANT
- > HIGH QUALITY TURF
- > WATER SAVING
