Service

Expertise

Blending innovation and value into exceptional seed products. Mixing incredible service and expertise to form lasting relationships.

BABE Kentucky Bluegrass has some of the same properties similar to the popular varieties like Shamrock, Brooklawn, and Midnight Kentucky bluegrass. It has a improved darker green color even under reduced fertility. **BABE** exhibits early Spring green-up characteristics in recent trials at Rutgers University. It also ranked at the top among bluegrasses in leaf spot, stem and crown rust disease resistance in testing. **BABE** was also entered into the 2016 National Cool-Season water use drought tolerance test and scored high on color retention and survivability in the rainout shelters at all 5 locations.

BABE Kentucky Bluegrass has very good performance versus the fungal diseases dollar spot and summer patch, Use **BABE** Kentucky Bluegrass as a component in your turfgrass mixes to offer an excellent and versatile choice for great looking turf. It also ranked at the top among bluegrasses in traffic tolerance, a useful feature for golf and sports turf applications.
