

TIREM

Kentucky Bluegrass

Value

Innovation

Service

Expertise

Blending innovation and value into exceptional seed products. Mixing incredible service and expertise to form lasting relationships.

Tirem was selected for its deep roots and exceptional performance in drought conditions. **Tirem** mixes well and compliments Perennial Ryegrass and Tall Fescue. **Tirem** can handle low mowing .50" (1.25 cm.) and is a popular choice for golf course use. It is also ideal for low maintenance situations as it maintains great turf performance even with reduced fertilizer and watering. **Tirem** germinates and establishes rapidly which makes it ideal for use in sod, especially when blended with Tall Fescue. **Tirem** performs excellent throughout the typical cool season zones and well into the transition zone. It can be utilized as a component with Perennial Ryegrass to enhance the seasonal turf performance in the overseeding of bermudagrass in southern athletic fields. It can also be mixed with tall fescue for the Transition Zone.

Features & Benefits

- > SUSTAINS WINTER COLOR REMARKABLY WELL
- > TOLERANCE TO SALT AND HEAT PRESSURE
- > QUICK ESTABLISHMENT
- > SIGNIFICANT WATER SAVING POTENTIAL
- > DISEASE RESISTANCE SPECIFICALLY TO DOLLAR SPOT, RUST, SUMMER PATCH AND RED THREAD
